### Summary

This data provides users with information about the runway locations and attributes for national and regional analysis applications.

### Description

The Airport Runways dataset is as of July 13, 2018, and is part of the U.S. Department of Transportation (USDOT)/Bureau of Transportation Statistics's (BTS's) National Transportation Atlas Database (NTAD). The Airport Runways database is a geographic dataset of runways in the United States and US territories containing information on the physical characteristics of the runways. The 7169 runways in the dataset are runways associated with the 19765 airports in the companion airport data set. This geospatial data is derived from the FAA's National Airspace System Resource Aeronautical Data Product.
