Summary

Nonattainment Areas for Criteria Pollutants (Green Book): Areas of the country that meet or violate air quality standards.

The EPA Green Book provides detailed information about area National Ambient Air Quality Standards (NAAQS) designations, classifications and nonattainment status. Information is current as of the Green Book posted date and is available in reports, maps and data downloads. See https://www.epa.gov/green-book and https://www.epa.gov/green-book/green-book-gis-download for more information.

These metadata are for a set of layers depicting non-attainment areas for different types of pollutants, based on standards at different dates, as follows based on https://www.epa.gov/green-book/green-book-gis-download as of 1/16/2024:

Table 1: Shapefiles Developed as Part of the Nonattainment Area Designation Process

¹ Updates are made to the posted Shapefiles to add or adjust area boundaries or make corrections. The "Last Shapefile Update" date indicates when a shapefile was last modified.

² External Data Files contain the nonattainment/maintenance status and classification at the time of the Green Book posting. External Data Files can be linked to the shapefiles through the composID field in each file and are provided in spreadsheet (xls) and xbase (dbf) formats compressed into one file. Multi-state nonattainment areas are not considered maintenance areas until all states in the area have been redesignated.

³ Not included in GEM.
