Summary

This feature class represents Sage-Grouse Priority Habitat Management Areas (PHMAs) for greater sage-grouse.

Description

PHMAs are BLM-administered lands identified as having the highest habitat value for maintaining sustainable greater sage-grouse populations.

Credits

Compiled by the BLM's Wildlife Habitat Spatial Analysis Lab. Data created and submitted to the NOC by each individual EIS.

Use limitations

These data are provided by Bureau of Land Management (BLM) "as is" and might contain errors or omissions. The User assumes the entire risk associated with its use of these data and bears all responsibility in determining whether these data are fit for the User's intended use. The information contained in these data is dynamic and may change over time. The data are not better than the sources from which they were derived, and both scale and accuracy may vary across the data set. These data might not have the accuracy, resolution, completeness, timeliness, or other characteristics appropriate for applications that potential users of the data may contemplate. The User is encouraged to carefully consider the content of the metadata file associated with these data. These data are neither legal documents nor land surveys, and must not be used as such. Official records may be referenced at most BLM offices. Please report any errors in the data to the BLM office from which it was obtained. The BLM should be cited as the data source in any products derived from these data. Any Users wishing to modify the data should describe the types of modifications they have performed. The User should not misrepresent the data, nor imply that changes made were approved or endorsed by BLM. This data may be updated by the BLM without notification. The BLM should be cited as the data source in any products derived from these data. Any Users wishing to modify the data should describe the types of modifications they have performed. The User should not misrepresent the data, nor imply that changes made were approved or endorsed by BLM. This data may be updated by the BLM without notification. Users are further cautioned that these data and interpretations derived from them do not eliminate the need for onsite survey and evaluation of specific sites.

LEGAL CONSTRAINTS

LIMITATIONS OF USE

The BLM assumes no responsibility for errors or omissions. No warranty is made by the BLM as to the accuracy, reliability, or completeness of these data for individual use or aggregate use with other data; nor shall the act of distribution to contractors, partners, or beyond, constitute any such warranty for individual or aggregate data use with other data. Although these data have been processed successfully on computers of BLM, no warranty, expressed or implied, is made by BLM regarding the use of these data on any other system, or for general or scientific purposes, nor does the fact of distribution constitute or imply any such warranty. In no event shall the BLM have any liability whatsoever for payment of any consequential, incidental, indirect, special, or tort damages of any kind, including, but not limited to, any loss of profits arising out of the use or reliance on the geographic data or arising out of the delivery, installation, operation, or support by BLM.

OTHER CONSTRAINTS

None, these data are considered public domain.

OVERVIEW DESCRIPTION

ENTITY AND ATTRIBUTE OVERVIEW

The decision and habitat data submitted by an EIS was identified by the EIS name and alternative through the addition and calculation of the EIS_HAB field. The EIS_HAB field calculation was performed according to the following template: For Priority habitat: "EIS Name"_"PH"_"Alternative". For General habitat: "EIS Name"_"GH"_"Alternative" or "EIS Name"_"IH"_"Alternative" (representing Idaho's Important Habitat Management Areas).
